

Voith Turbo

VOITH

**Voith Turbo South Africa
Global Competence with Local Support**

Voith Global Partner

Innovation and Experience Perfectly Combined

Voith is one of the largest family-owned enterprises in Europe with a worldwide workforce of about 39 000, sales of more than EUR 5 billion and 280 locations. We all have one major goal – to be the preferred solutions provider and partner to our customers – with innovative power, reliability and fairness. Voith leads the market in paper technologies, hydropower, power transmission and industrial services.

At modern test benches we carry out dynamic tests up to 7 MW. In this way we make sure that only products that meet our customers' needs enter to the market.

Superior research and development

Together with our clients and partners we continuously work on innovations and improvements. More than 11 000 active patents are tangible proof of Voith's innovative power. 500 patents are added every year. To sustain this, we spend more than 5% of our turnover on research and development (R&D).

Our R&D focus enables us to provide our customers with the latest value-adding technology combined with the highest levels of environmental and safety standards worldwide.

Efficient and reliable power transmission

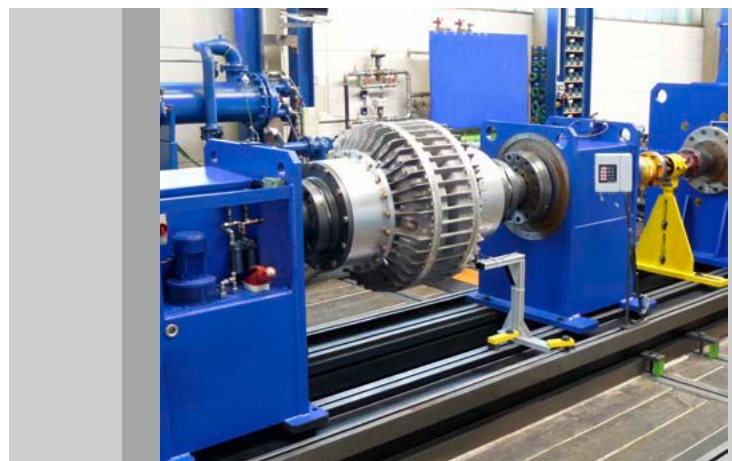

Voith Turbo is a leading solutions provider in the field of mechanical power transmission in a wide variety of applications. Our components and systems drive machines efficiently and reliably. For these reasons many of our customers have standardised on Voith equipment to ensure peace of mind and maximise operational profitability. In summary: Voith solutions, that add value for our customers.

Optimised Solutions, Added Value

Voith Turbo is globally both a market and technology leader in hydrodynamic power transmission. For decades, Voith Turbo has been and remains a reliable and innovative partner for the worldwide mining and raw materials handling industry.

Voith hydrodynamic start-up components in drive systems offer multiple benefits wherever heavy masses need to be accelerated smoothly, whenever maximum reliability and efficiency is required, no matter how tough the conditions.

In the mining and raw material handling industries, Voith turbo couplings are a key component for the reliable and economical operation of belt conveyors, armoured face conveyors, mills and crushers. Your optimised solution is our goal. We engineer and design tailored solutions for your drive requirements that provide you with the best possible benefits.

Quality and safety

We never compromise on quality or safety. Our products comply with the most stringent international regulations and standards. We are certified to DIN ISO 9001 TÜV, ATEX and MSHA, for example, and also other regional mining standards.

Proven reliability

Records of Voith equipment in operation show a reliability of more than 99% in applications worldwide.

Quality Made by Voith

World-Class Products

Voith Turbo (Pty) Ltd. located in Boksburg, South Africa, is a member of the worldwide Voith group of companies headquartered in Heidenheim, Germany. Our customers are assured of receiving the same global standard of service that would be received from our parent organisation in Germany.

Voith's world-class workshop and stores operations in South Africa occupy a total of 2 700 square metres under one roof and provide comprehensive regional service support for hydrodynamic couplings in Sub-Saharan Africa. Our operations are integrated with a TÜV quality system that is compliant with international standards.

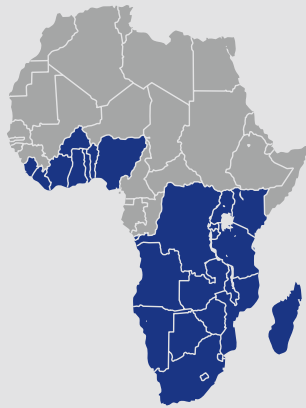

All employees and partners working with us worldwide undergo regularly updated and ongoing comprehensive product and application training that results in a dynamic pool of specialist knowledge. Part of this training includes modules conducted at our German-based research and development centre in Crailsheim.

This means that you have peace of mind, knowing that you are dealing directly with the OEM when it comes to engineering, service and quality.

Voith Turbo's main facility in South Africa is based in Boksburg, Gauteng, and includes sales, workshops, stores and testing facilities, distribution and field service team.

Customer-Oriented Support

Voith Service Covers Africa

Representative area of Voith Turbo (Pty) Ltd.

Always close to our customers

An extensive network of Voith representatives, distributors and agents ensures sales, service and distribution coverage within the African continent. This ensures fast and flexible local support combined with the expertise of the German OEM.

Comprehensive service from one single source

There is nothing more expensive than unscheduled downtime of your plant. To assist you, we offer specialist consulting services that identify areas of 'down-time risk' and provide service solutions that add real value, maximising both your product and plant availability. We are able to provide these services upfront at project stage or as part of an existing plant upgrade, where optimisation is the goal. We offer the following services:

- retrofit or modernisation
- overhaul and maintenance
- commissioning
- 24/7 helpline

We provide you with a one-stop service for the lifetime of your machine.
